

## A3 Communications' Mike Massari Earns Industry Sought-after RCDD Credential

**NORCROSS, GA (April 22, 2014)** — A3 Communications, America's fourth fastest growing systems integrator, announced today that their Atlanta-based Pre-sales Engineer, Mike Massari, earned his Registered Communications Distribution Designer (RCDD) credential – one of the highest design credentials in the information technology systems (ITS) industry, recognized worldwide.

Mike Massari

As a RCDD, Massari demonstrates knowledge in the design, integration and implementation of telecommunications and data communications technology systems and related infrastructure. He is now uniquely positioned to create detailed designs of new systems and/or integrate design into an existing structure.

To gain this designation, Massari was required to have at least five years of experience or an equivalent combination of experience and industry certifications. Additionally, he spent hundreds of hours studying the telecommunications distribution methods manual and sat through numerous ITS fundamental and design courses. Ultimately, to earn the prestigious RCDD credential, Massari proved his knowledge by passing a very extensive exam.

"We're so proud of Mike and his recent accomplishment. This

certification not only verifies his knowledge in ITS design subject areas, but also allows our clients to know that they're working with the very best in the industry. We take our jobs seriously and this accreditation helps prove that," said Brian Thomas, President of A3 Communications.

Massari is one of two full-time RCDDs employed by A3 Communications.
