

## 10 A3 Communications Employees Earn OSHA 30-hour Certification

**COLUMBIA, S.C. (June 25, 2018)** — To support maximum health, safety and jobsite security for both employees and clients, A3 Communications, Inc., one of the nation's fastest growing systems integrators, recently sponsored Occupational Safety and Health Administration's (OSHA) 30-hour General Industry training for 10 full-time employees. This vital but voluntary program provides training on the recognition, avoidance, abatement and prevention of safety and health hazards in the workplace and on work sites.

"As a leader in our industry and community, it's crucial we assume full responsibility for the wellbeing of our staff and customers," said Brian Thomas, President and CEO. "By continuing to update our understanding of evolving safety requirements, we can better provide the safest possible professional environment for our clients."

The following individuals underwent rigorous instruction and testing to achieve their OSHA 30-hour General Industry certification: Larry Sams, Project Manager; Jaimon Perry, Project Manager; Jamie Cook, Branch Operations Manager; Tommy Abate, Senior Project Manager; Brett Cooke, Project Manager; James Carey, Project Manager; Kyle Miller, Project Manager; Michael Taylor, Director of Operations; Rachel Martin, Human Resources Manager; and Ryan Lewis, Human Resources Coordinator/Fleet Manager.

"We make a promise to our clients that we will perform our services the right way the first time. To accomplish this, it's vital we equip our

staff with the best training and education available," said Thomas. "Through completion of OSHA 30-hour training, we maintain the confidence of both parties: our staff and our customers."

Individuals also have the choice to earn an OSHA 10-hour certification where general awareness of job-related safety and health hazards are introduced. Specifically, the 30-hour program is designed with consideration to supervisors and project managers, featuring in-depth discussion of all potential safety violations.
