

A3 Communications Awarded Newly Adopted South Carolina Security and Protection State Contract

COLUMBIA, SC (January 8, 2013) — A3 Communications, a leading information technology and physical security contractor for the Southeast, announced today that they can now provide physical security products and associated labor to South Carolina state agencies through a newly adopted, state-wide security and protection contract.

The Nevada State Purchasing Division, on behalf of WSCA-NASPO Cooperative Purchasing Organization, LLC, recently awarded contracts for security and protection services—effective through October 31, 2017. Access control systems and Closed Circuit Television (CCTV), more commonly referred to as video surveillance systems, are amongst the products and solutions available for purchase through this unique procurement vehicle.

Only 15 security integrators nation-wide were qualified and awarded contracts through this agreement. A3 Communications is one of three contractors in South Carolina who can sell under the participating addendum that the South Carolina Information Technology Management Office (ITMO) signed with the State of Nevada and WSCA-NASPO. This allows all South Carolina governmental agencies and political subdivisions to purchase from contract number 4400007565.

“We have been providing public and private organizations with advanced and robust physical security solutions for almost 10 years throughout the Southeastern US. With this newly adopted WSCA-NASPO Security and Protection contract, we are proud to offer South Carolina clients an easier way to procure these solutions,” said Brian Thomas, President of A3 Communications. “With a more streamlined procurement process, this will allow our state’s facilities to become more secure, quicker.”
