A3 Communications Helps SMBs Keep Their Network Running Smoothly Whether You're Using iPhones, Droids or VoIP

With More Employees "Bringing Their Own Devices," Networks Are Getting More Complex

COLUMBIA, SC (December 19, 2012) — A3 Communications, Inc., a leading provider of unified communications and technology management services, announced today the launch of their Bring Your Own Device (BYOD) management services. With more and more organizations finding themselves facing the challenges of a BYOD environment, A3's solutions are coming at just the right time.

Increasingly, organizations are recognizing the need for a diversity of support in their infrastructure. They are facing new challenges every day in trying to support mesh wireless, transient users, and meet the security challenges that go along with it. In addition, as employees continue to seek out best of breed solutions for individual tasks, today's networks face are far from unified networking environment.

A3 Communications lets organizations be proactive in managing their infrastructure. This means reduced costs, better security and a network that is more aware of who and what is connecting to it.

Organizations need to be alerted when a new device is coming onto the network. A3 helps an organization scan a device to make sure it is not bringing with it security risks, and establish proper security measures for access control levels, including the separation of employees from guests. A3 can identify which devices are using the lion's share of an organization's bandwidth, and make infrastructure changes to accommodate the changing needs of the BYOD user.

"A business should be able to focus on what it does best and our solutions free up businesses to do just that. By bringing proactive infrastructure management to the BYOD environment, our clients enjoy greater efficiency, security and agility. A more efficient network means that our customer's technology is running to its fullest capacity. When we're increasing overall productivity our customers are dropping more to the bottom line and that's how we know that our customers have a leg up on their competition," stated Brian Thomas, President of A3 Communications, Inc.

About A3 Communications, Inc. — With offices in Columbia, Charleston, Greenville and Atlanta, A3 Communications provides award-winning business information technology and communication services to over 2,500 commercial and public clients throughout the Southeast.
